

METHOD AND SYSTEM OF DOCUMENT TRANSFORMATION BETWEEN A
SOURCE EXTENSIBLE MARKUP LANGUAGE (XML) SCHEMA AND A TARGET
XML SCHEMA

5

ABSTRACT OF THE INVENTION

A method and system for the transformation of
extensible markup language (XML) documents. Specifically,
one embodiment of the present invention discloses a method
10 comprising modeling a source XML document corresponding to a
source schema as a source tree having a plurality of source
nodes, and modeling a target XML document corresponding to a
target schema as a target tree having a plurality of target
nodes. A sequence of transformation operations that
15 transforms the source tree to the target tree is then
generated.
